

The Rainbow Body

In this training we will be laying down patterns and energies of consciousness that will affect all aspects of our life and on towards the future of this life, the time in between lives, and future incarnations

Based on the process yogis and practitioners go through to achieve the Rainbow Body, we will be working with the Divine, Our Guides and Teachers, Our Higher Self, and the Arcturians to transform and imbue our five elements (earth, water, fire, air, and space) with divine light in all our seven subtle bodies.

Benefits:

1. Complete transformation and overhaul of our consciousness and subtle body system.
2. Physically and energetically feel lighter.
3. Able to transmit to others positive emotional and mental states of consciousness.
4. Think more clearly and accurately.
5. Resonate with higher planes and higher spiritual beings of increased light and capacity.
6. Access for longer durations to our non-dual divine consciousness in all states: waking, dreaming, deep sleep, and bliss.

Session 1: Transforming the Divine, Spiritual, and Causal Bodies

In this session we use the Arcturian Rainbow Light Frequencies to work with our five elements (earth, water, fire, air, and space) at the highest dimensions of our being.

Here we are accessing the Light within and alchemically transforming these subtle plane bodies to hold more Light and higher frequencies.

We make a connection to those Higher Beings resonating with the Rainbow Body and who have achieved it in earlier incarnations.

Session 2: Transforming the Emotional and Mental Bodies

In this session we begin to work with our feeling states and clarity of consciousness.

We bring more light into our emotional and mental body through the use of the Arcturian Rainbow Light Frequencies and activate and purify the five elements at the emotional and mental levels.

As we do the purification, we feel lighter and think more clearly, effortlessly, and quickly. Our mental processing speeds become faster.

Session 3: Transforming the Etheric and Physical Bodies

In this session we work with our most dense bodies.

We bring Light at the molecular, cellular, and DNA levels.

We work with the five elements as they relate to specific organ systems in our body (liver, kidney, heart, lungs, and spleen). We purify these organs and also imbue them with more Light and consciousness.
